READ YOUR WAY TO RICHES

BY ANDREW HEWITT

Let's face it. We don't learn about becoming rich in school. It can be argued that most of your professors wouldn't be professors if they knew how to become rich themselves.

So what are the secrets of the rich? How can we learn to become ultra-wealthy and retire well before we wrinkle? In my experience, there is no better way to learn than going right to the source. That is, reading the books of those who are rich and applying their proven strategies to your own life.

This special report is split into four sections to help you find the books that will work best for you. Some focus on using specific vehicles to create wealth, some are geared for money management and other are simply **MUST** reads.

If you read all of the books in the books in the 'Must Read' category you will have a higher financial IQ than 99% of people on our planet. If you take action and implement a strategy in one of the books in the 'the four best vehicles for creating passive income as a young adult', you will be well on your way to becoming rich at a very young age. If you read 80% of the books in this report, you will know more about money than most of the college 'finance' professors across the country... and perhaps you will do your peers a favor and apply to take over their job!

Whatever books you choose to read from this report, I have full confidence they will significantly enrich your life and set you on the path to financial abundance.

Cheers to financial freedom before 40!
